

	Your Name	Name of group or class or NGO or company (if applicable)	Project Name	Short description about your project.
Farming	Mark Hindelang	Aquaponica	Aquaponics Organic Food Production , Sustainability & Food Security	<p>Small Aquaponics Demonstration</p> <p>Aquaponics is the continuous and sustainable cultivation of fish and plants together in an ecosystem utilizing natural bacterial cycles to convert fish wastes to plant nutrients. It is an environmentally friendly, natural food growing methodology without the need to filter or add chemical fertilizers or pesticides.</p> <p>Several advantages include: Efficient Water Usage (1/10th the water of soil based systems), Lowered Environmental Impacts (they are not dependent on fossil fuels) and the optimized [faster than soil based] production of two crops (fish and plants) from one source (fish feed). Even more incredible synergies exist in pairing Renewable Energy with Aquaponics.</p>
Farming	Neil	Siam Organic	Jasberry Rice	<p>Jasberry rice project is about growing sustainable food. We do this through education and sustainability, adopting internationally-certified organic farming methods and educating about the importance of sustainable food source. As consumers, we feel that it's important for students understand where the food come from and how they can help support local food.</p>
Farming	Timothy Chung	Adams Organic	Organic Vegetables, Market and Farming	<p>Our company produce certified organic vegetables. Most of our vegetables are grown in Thailand and sold mostly in Thailand. We own and operate a number of farms and we work with numerous organic farmer groups all over northern Thailand.</p> <p>In terms of topic, i can talk about operating an organic farm, selling vegetables from a farmer's perspective, why organic food, amazing things you can do with vegetables to make them more awesome.</p>
Farming	Mr.Somchai Pamanikabud	Wormboy	Worm Compost & Worm Tea and others Wood Working Products	<p>Worm Compost are the Organic Fertilizer. Good to put in your garden, plants, or trees. Your plants or your garden are growing strong. Full with Natural Nutrition with your plants. Worm Tea are Liquid Fertilizer. Mix with water and spray on the leaves will help plants. Insect eating the leaves.</p> <p>Wood Working : I do have some wood working products which I did such as Wood Clocks etc.</p>
Tree farm	Khun Tik	BRING THE ELEPHANT HOME	Growing Trees	<p>A part of helping wild elephants is rebuilding the forest. Learn how to grow young trees in the ISB nursery to be planted for elephants later or take it home and plant it in your garden.</p>
Animals	Edwin Wiek	WFFT	Wildlife trade and exploitation	<p>Wildlife trafficking in Thailand and the region.</p>
Animals	L. Bruce Kekule	Wildlife Photographer	Wild Thailand	<p>A short presentation (1 hour or so) of wildlife images and videos taken in some areas in Thailand. The emphasis will be on tigers, leopards, elephants and other species that still survive in the wilds of the Kingdom. Other creatures like birds, reptiles, and amphibians. Some landscapes will also be shown. The most important thing will be conservation and the need to protect and save these species and ecosystems for future generations.</p>

Animals	Antoinette Van de Water	BRING THE ELEPHANT HOME	Restoring the forest for wild elephants	Bring the Elephant Home is aiming for a better chance of survival for Asian elephants by restoring natural habitat, by stimulating animal friendly eco-tourism, by creating elephant families and by finding solutions to mitigate human-elephant conflicts. cooperating closely with local organizations and communities.
Animals	Joshua Plotnik	Think Elephants International	Linking the study of elephant behavior with conservation education	We are scientists that study the evolution of intelligence in elephants. In particular, we study awareness and whether elephants can recognize themselves in a mirror, how they use their social relationships through studies on cooperation and how they use their senses in the physical world. This research is important because it provides a window into the more we know about how and why elephants make decisions the better prepared they are to be in the wild. In addition, we have designed a comprehensive education curriculum for students about behavior and elephants and have plans to launch this curriculum in the near future. Visit www.thinkelephants.org or www.facebook.com/thinkelephants
Animals	Matthew Pritchett	Freeland	iTHINK	iTHINK is a public awareness campaign which aims to reduce the consumption of endangered species. The endangered animals of the world are dwindling because they are being used in traditional medicine, as pets and for food. iTHINK encourages the public to stop buying and trafficking and encourage others to change their behavior to help protect planet for future generations.
Oceans	Liz Ward	Shark Guardian http://www.sharkguardian.org/shark-guardian-first-quarter-2014/	Shark Guardian	We have age appropriate presentations for ES, MS, and HS to teach them the importance of sharks. (Highly recommended by Kerry Dyke as a must see presentation)
Oceans	Billy Marinelli	Seafood guru	World without fish	What will happen to this planet if we keep over fishing? How dangerous is "farm to table" for health and the environment? What can we do to protect the future of our planet?
Oceans	Charlie Fasano	Ocean Artists Society	Ocean Conservation through Marine Art...Thailand	My talk is about art inspiring conservation to begin, then I discuss the pollution and environmental concerns to Thailand and Bangkok in particular, and close with everyday lifestyle choices to help live more sustainably. It flows to a story of what the "Think Globally, Act Locally". More importantly, because we are an artistic Society, my talk has LOTS of visual aids and films to keep the students entertained and interested. Also, it does involve audience participation in the form of the student(s) joining me on stage. This portion gets a lot of laughs.
Business	G.G.	Villa	greening the store	ISB Villa green team - working together to make the store more sustainable. Beginning. Looking for classes to join us if it connects to what you do in your classroom.

Business	Graham Harper	Educational Travel Asia by Buffalo Tours	ETA	<p>ETA works with subsistent upland farming communities in Cambodia, Laos, Thailand.</p> <p>Are subsistent upland farmers concerned about forest conservation when they grow? Yes, they get much of their food from forests, and growing populations and economic access.</p> <p>Are subsistent upland farmers concerned about use of pesticides and chemical fertilizers? Yes, they know there are health and environmental risks, yet they also know increased yields they want out of poverty.</p> <p>Are subsistent upland farmers concerned about their children's future? Yes, the traditional ways of life are under threat.</p> <p>Are the answers to these concerns easy to find? No, they are complex and involve sustainability (poverty, environment, society).</p> <p>In each country ETA works our sustainable, community-based tourism projects with upland farming communities efforts to take action on poverty, environment and social issues.</p> <p>ETA also works with schools to partner with a community project and learn by teaching about environment and social issues.</p>
Recycling	Miyuki Jessee	Calligraphy	Calligraphy work on recycled hand-made paper (TBD)	Students will make recycled paper from milk packs, then write some words related to recycling. (Note - this will be set up at a booth in the cafeteria. Kids can try it during their lunch break.)
Recycling	Kerry Dyke	Paper Rangers	Paper Rangers	Make your own notebook out of used papers. Suitable for kids grade 4-8
Food & energy	Erin Stanley	Traidhos Three Generation Barge Program	Traidhos Three Generation Barge Program	<p>Traidhos Three Generation Barge Program is an Environmental Education program hosting trips on the Chao Phraya River and land based sites throughout Thailand. During ISB Earth Week we are offering the following activities:</p> <p>Waste Timeline - looks at how long things take to break down in the environment</p> <p>Ecological Footprint Quiz</p> <p>Energy Trace - shows how energy is used in the process of corn seeds to corn</p> <p>Food, Carbon and Energy - considering how much carbon and energy is needed to produce different foods, and which ones are most sustainable.</p> <p>We are available for class sessions Tuesday - Thursday</p>
Food waste	Swikriti Dasgupta	Green Panthers	Save Food	This project will focus on raising awareness about the importance of saving food and reducing food waste for a sustainable future. (Note - this will be done during the Tuesday sessions in the cafeteria with Chevron and also at a booth in the cafeteria during lunch. The presenter is a student who will be in your classes unless she is already in your class).
